

Compact Monitor X version

CMX-100

- Show Common Items for Tuning and Racing
- Easy Operation Push Button
- Peak-holding Feature
- Easy Connection
- Ultra Compact

CMX-100N (BLUE) for NISSAN
CMX-100H (BLACK) for HONDA

Compact Monitor CMX-100

Available for Nissan and Honda.

This amazing unit packs many features into its tiny box (about half the size of credit card!) Select one of the parameters from the list and view real-time data while you race or tune.. Each parameter comes with a peak-holding option just like conventional gauges. Simple to operate — just two push switches.

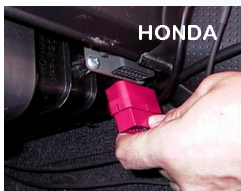

Quick and easy connection to diagnostic port

NISSAN

For NISSAN, simply plug in to Consult terminal under dash. (In order to use CMX-100N, your car must be equipped with Consult Diagnostic System)

Check our website for application

HONDA

For HONDA, simply plug in to OBDII diagnostic port. (In order to use CMX-100H, your car must be equipped with OBDII diagnostic system)

Check our website for application
